Pillar + Cluster Content Model

SEO Architecture for task19.com — Shopify & WooCommerce Keyword Clusters

1. Site Architecture (Sitemap View)

```
task19.com/
■■■ /services/
    ■■■ /shopify-development/              ← PILLAR A
    ■■■ /shopify-app-development/          ← PILLAR B
    ■■■ /shopify-b2b-development/          ← PILLAR C
    ■■■ /woocommerce-development/         ← PILLAR D
    ■■■ /woocommerce-plugin-development/    ← PILLAR E
    ■■■ /woocommerce-b2b-development/     ← PILLAR F
■■■ /blog/  (cluster posts, each linking up to its pillar)
```

Note on "shopify partners": build a lighter partners page (/shopify-partners/) AND weave "Shopify Partner agency" into Pillar A’s copy, title tag, and H2s. Do not create a third page competing for "shopify developers."

2. PILLAR A — /shopify-development/ ("shopify developers")

Goal: rank for the head term. This is your authority hub (1,200–1,800 words).

Section	Content
H1	Shopify Development Services
Intro	Who you are, certified Shopify Partner, years, stores launched
H2: Shopify Store Development	Design, theme customization (Liquid, OS 2.0), headless (Hydrogen/Remix)
H2: Shopify B2B Development	Brief + link to Pillar C
H2: Shopify App Development	Brief + link to Pillar B
H2: Our Process	Discovery → Design → Build → Launch → Support
H2: Portfolio	3–5 case studies with metrics
H2: Why task19	Team bios, certifications
H2: FAQs	5–6 questions with FAQ schema

Cluster posts (each 1,200–1,800 words, all linking up to Pillar A):

- **How to Hire Shopify Developers in 2026: A Buyer's Guide** — strong commercial intent
- **Shopify Partner vs. Shopify Plus Partner: What's the Difference?**
- **Shopify Liquid vs. Theme Customization vs. Headless: Which Does Your Store Need?**
- **Top Shopify Development Agencies Compared** — comparison posts earn links
- **Shopify Store Redesign: When and How to Do It**
- **How Much Does Shopify Development Cost in 2026?** — cost posts rank extremely well

Anchor variety: "our Shopify development services" / "task19's Shopify developers" / "work with a Shopify Partner agency."

3. PILLAR B — /shopify-app-development/ ("shopify app development for b2b")

Highest-value cluster — B2B app queries = high-ticket leads.

Section	Content
H1	Shopify App Development for B2B
Intro	B2B problem: off-the-shelf apps don't handle company accounts, net terms, volume pricing
H2: Custom B2B Apps We Build	Quote management, customer-specific pricing, bulk order portals, ERP sync
H2: Technologies	Shopify Functions, Checkout Extensibility, GraphQL Admin API, app blocks

H2: Public vs. Custom B2B Apps	Decision framework (links to cluster post 1)
H2: Process	Scoping → UI extension design → Build → Shopify review → Maintenance
H2: Case Study	One app with real numbers
H2: FAQs	Timeline, cost, "Can you build apps for Shopify Plus B2B?"

Cluster posts:

- **Custom Shopify App vs. Public App for B2B: Total Cost Compared**
- **Shopify Functions Explained: Building Custom B2B Pricing Logic**
- **How to Build a Bulk Ordering App on Shopify B2B**
- **Shopify Checkout Extensibility: What B2B Stores Can (and Can’t) Customize**
- **10 Must-Have Features in a Shopify B2B App**
- **Shopify B2B APIs: A Developer’s Guide to Company Accounts and Draft Orders**

4. PILLAR C — /shopify-b2b-development/ ("shopify b2b store development")

Section	Content
H1	Shopify B2B Store Development
Intro	B2B is different — buying committees, net-30 terms, quantity breaks
H2: Native B2B Features	Company profiles, catalogs, quantity pricing, vaulted cards, payment terms
H2: Builds We Deliver	Wholesale portals, hybrid B2B/B2C, distributor storefronts
H2: When You Need Shopify Plus	Honest threshold breakdown
H2: Migration to Shopify B2B	From Magento, BigCommerce B2B, WooCommerce
H2: Case Studies + FAQs	With schema

Cluster posts:

- **Shopify B2B vs. WooCommerce B2B: An Honest Comparison** — bridges to your WooCommerce pillars
- **Shopify Plus B2B Features: What's Included vs. What Needs Custom Dev**
- **Setting Up Customer-Specific Pricing on Shopify (Step-by-Step)**
- **B2B Store Design: 8 Patterns That Increase Wholesale Conversions**
- **Migrating a Magento B2B Store to Shopify: A Complete Checklist**
- **Hybrid B2B + B2C on Shopify: One Store, Two Experiences**

5. PILLAR D — /woocommerce-development/ ("woocommerce store development")

Section	Content
H1	WooCommerce Store Development Services
H2: Custom Store Builds	From-scratch builds, theme development
H2: WooCommerce B2B Stores	Link to Pillar F
H2: Plugin Development	Link to Pillar E
H2: Performance Optimization	Critical differentiator for Woo
H2: Process / Portfolio / FAQs	Standard

Cluster posts:

- **How to Choose a WooCommerce Development Agency**

- **WooCommerce vs. Shopify for [Industry]** — publish 2–3 industry variants (wholesale, manufacturing, distribution)
- **WooCommerce Performance: Why Stores Slow Down and How to Fix It**
- **How Much Does a WooCommerce Store Cost? (Full Breakdown)**
- **WooCommerce Store Migration: Moving to or from Shopify**

6. PILLAR E — /woocommerce-plugin-development/ ("woocommerce plugin development")

Section	Content
H1	WooCommerce Plugin Development Services
H2: Custom Plugin Development	Core service
H2: Categories We Build	Payment gateways, shipping integrations, B2B pricing, ERP/CRM connectors
H2: Tech Stack	WordPress hooks/filters, REST API, React admin blocks, WC blocks
H2: Maintenance & Support	Updates, WP compatibility, security patches
H2: Case Studies	2–3 plugins with outcomes
H2: FAQs	Cost, timeline, GPL/licensing questions

Cluster posts:

- **Custom WooCommerce Plugin vs. Off-the-Shelf: A Cost-Benefit Analysis**
- **How to Build a WooCommerce Payment Gateway Plugin**
- **Extending WooCommerce: Hooks, Filters, and Best Practices**
- **WooCommerce Plugin Security: 7 Rules Every Developer Follows**
- **WooCommerce REST API Integrations: Connecting ERPs and CRMs**

7. PILLAR F — /woocommerce-b2b-development/ ("woocommerce custom b2b store development")

Section	Content
H1	WooCommerce Custom B2B Store Development
H2: Custom B2B Builds	Registration/approval flows, role-based pricing, quote requests
H2: Features We Implement	Bulk order forms, MOQ, net terms, credit limits, reordering
H2: Plugin Strategy	Which B2B plugins to use vs. custom build (trust-builder)
H2: Case Studies	One hybrid B2B/B2C store, one pure wholesale
H2: FAQs	With schema

Cluster posts:

- **Best WooCommerce B2B Plugins Compared (and When You Need Custom Instead)**
- **Building a WooCommerce Wholesale Store: Complete Guide**
- **Role-Based Pricing in WooCommerce: Implementation Guide**
- **B2B UX on WooCommerce: Quote Requests, Negotiation, Net Terms**
- **WooCommerce B2B: 5 Stores That Do It Right (Teardown)**

8. Internal Linking Rules (Where Most Sites Fail)

- **Cluster → Pillar:** every cluster post links to its pillar 1–2 times, in the body (not just footer)
- **Cluster → Cluster:** 1–2 links to sibling posts in the same cluster (builds topical depth)
- **Pillar → Pillar:** Pillar A links contextually to B, C, D, E, F
- **Bridge posts:** comparison posts (Shopify vs. WooCommerce B2B, custom app vs. public app) link to BOTH ecosystems — passes authority across clusters
- **Anchor variety:** never repeat the exact same anchor twice in a row; rotate branded, partial-match, descriptive

9. Content Specs That Apply to Everything

- **Word count:** pillars 1,200–1,800; clusters 1,200–1,800. Depth beats length — match top 3 ranking pages and add what they lack
- **Schema:** FAQPage everywhere; Service + LocalBusiness on pillars; Article on posts; Organization sitewide
- **Freshness:** show "Last updated" and refresh quarterly — B2B eCommerce features change constantly
- **Author pages:** named developer bylines with real bio pages
- **One CTA per page:** "Book a discovery call" on pillars; "Download checklist / Get a quote" on posts

10. Publishing Sequence (Do NOT Publish All at Once)

Month	Publish
1	Pillars B, C, E, F (long-tail money pages) + 2 cluster posts each for B and E
2	3 cluster posts for C and F each, 1 comparison bridge post
3	Pillars A and D + 3 cluster posts each, 1 comparison post
4+	4–6 posts/month, alternating clusters; refresh month-1 posts

Why this order: B2B long-tail keywords are less competitive and convert better. You rank and get leads in months 2–3, which funds the longer fight for head terms (A, D).

11. How to Know It’s Working

Timeline	Signals
3 months	Impressions climbing in Search Console for cluster long-tails; cluster posts on page 2
6 months	Cluster posts ranking top 5; pillars on page 1–2 for B2B terms
9–12 months	Pillars competing for head terms; leads arriving from organic

If a pillar stalls on page 2 after 4 months: add more/better internal links from cluster posts and one strong external link — not more words on the pillar itself.
